-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to your preliminary amendment filed 2/10/06.

Claims 1-20 are currently pending in this application.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The abstract of the disclosure is objected to because it should be in a separate page. The abstract provided is that of the corresponding PCT application. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 11-12, 13-15 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Zuk et al. P.N. 6.725,079 (Zuk).

Zuk discloses a system for locating the position of an object during interventional MRI.

The MRI apparatus as is well known consists of a main magnetic field generating

assembly a gradient field generating assembly and a receiving coil or antenna for the NMR signals as described for example in claim 1 at issue. In addition Zuk discloses a tracking system for determining the location of an object in the Magnetic Resonance suite. This tracking system uses markers (see elements 24 in Fig. 1A-B) that in the preferred embodiment are electromagnetic-radiation-reflective markers responsive to an electromagnetic radiation transponder. See lines 32-35 of col.7. Zuk meets all the limitations of the claims at issue.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 is in error as it is a method claim dependent on an apparatus claim.

Apparently applicant intended claim 18 to depend from a claim other than 11.

Allowable Subject Matter

8. Claim 20 is allowed.

9. Claims 5-10 and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Urbas et al., Schmitt and De La huerga all disclose systems in which use is made of transponders. See the abstract of each disclosure.
